SUMMARY

Computer Science undergraduate with strong foundations in software development, cloud computing, and artificial intelligence. Experienced in building AI-driven systems using Graph Neural Networks and Reinforcement Learning, with hands-on experience in Azure and AWS environments.

EDUCATION

Vellore Institute of Technology, Amaravati	Oct 2022 – Present
B.Tech in Computer Science and Engineering	CGPA: 8.31/10
Narayana Junior College, Chilakaluripeta	Jun 2020 – Apr 2022
Intermediate (MPC)	77.4%
Narayana EM School, Edlapadu	Jun 2019 – Apr 2020
10th Grade	89%

TECHNICAL SKILLS

Programming: Java, Python, SQL, Object-Oriented Programming (OOP)
Web Technologies: HTML, CSS, JavaScript, React.js, Node.js, RESTful APIs
Databases: MySQL, NoSQL
Cloud & DevOps Tools: Microsoft Azure, AWS, Git, CI/CD
Core CS: Data Structures, Operating Systems, Computer Networks, DBMS, Linux

PROJECTS

GNN-Guided Attack Prediction and RL-Based Network Defense	Nov 2025
Python, Graph Neural Networks (GAT, GCN, GraphSAGE), Reinforcement Learning (PPO), CVSS, CIC-IDS 2017	
- Developed a hybrid cyber-defense framework combining Graph Neural Networks and Reinforcement Learning to predict and mitigate multi-stage DDoS attacks. - Constructed dynamic attack graphs by integrating CVSS vulnerability data with real network traffic from the CIC-IDS 2017 dataset. - Designed a custom GNN architecture achieving over 90% accuracy and 89% Top-3 target prediction accuracy. - Implemented a PPO-based RL agent to autonomously select optimal node-protection actions, reducing compromised nodes by up to 65%. - Evaluated performance using Accuracy, Precision, Recall, F1-score, MAE, cumulative reward, and protection effectiveness metrics.	
Personal Portfolio Website	May 2025
HTML, CSS, JavaScript, Bootstrap, Azure	
- Built a responsive portfolio website showcasing projects and skills with a mobile-first design. - Deployed on Microsoft Azure ensuring scalability, availability, and secure hosting. - Used Git for version control and optimized UI for cross-browser compatibility.	
Age and Gender Detection System	Sep 2024
Python, CNN, OpenCV, UTKFace Dataset	
- Developed a multi-task CNN model for age estimation and gender classification using TensorFlow and Keras. - Designed a complete ML pipeline including preprocessing, training, evaluation, and real-time inference. - Achieved high classification accuracy with low MAE and visualized results using OpenCV and Matplotlib.	

CERTIFICATIONS

Microsoft Certified Azure AI Fundamentals	Jul 2025 – Present
Microsoft Certified Azure AI Engineer Associate	Jul 2025 – Present
Blackbuck Full Stack Development with MERN	May 2025 – Present
PCAP: Programming Essentials in Python	Apr 2024 – Present
AWS Certified Cloud Practitioner	Aug 2025 – Aug 2028
